

## Environmentally-friendly Pet Waste Management

### Solubag® Solupets®

*Solubag® Solupets®* is a high-quality water-soluble, environmentally-friendly bag designed specifically for disposing of pet waste based on *Solubag®*, a patented material created to reduce plastic pollution.

The *Solubag®* eco material is made from non-toxic components, consisting of a synthesis of calcium carbide and natural gas. The components are so harmless that the bag itself can be dissolved, drank, or even eaten by humans or animals without causing any health issues. The bag performs exactly like a traditional plastic bag, and will only dissolve if immersed in water above a certain temperature, or if left in cool water for several days.

- 100% Solubag® Material
- Soluble in water
- Organic additive
- 100% Environment friendly
- **Certifications**
  - Biodegradability**  
ISO 14855-1: 2012
  - Solubility**  
SGS EN 14372: 2004
  - Safety**  
SGS EN 71-3: 2013 + A1: 2014  
Nch 409/ 1 of. 2005
  - No Plastic, FTIR Standard**  
ASTM E 1252-98 (2013)  
PGC-MS / ISP 17257: 2013
  - Certified by FDA**  
US FDA 21 CFR 175.300
